BENEFITS

- ✓ Provides a uniform source of nutrition in a palatable, convenient form with reduced dust.
- ✓ Amino Acid balanced for improved muscle growth and development. Ideal skeletal development is optimized through Balanced calcium and phosphorus levels and other essential minerals.
- ✓ Functions as an antioxidant and supports immune response to help minimize the effects of stress.
- ✓ Contributes to a glossy coat and provides necessary energy for high levels of activity.
- ✓ Reduced carbohydrate intake – a concern linked to developmental problems in growing horses.
- ✓ Encourages maximum feed utilization while decreasing digestive upsets
- ✓ Stimulates appetite and encourages consumption.

FEEDING DIRECTIONS:

Mature Weight of Horse (kg)		400	500	600
Type of Horse	Age (years)	kg Feed per Day		
Yearlings	1	3.5 - 5.5	4.0 - 6.0	4.0 - 6.5
Two Year Olds	2	4.0 - 6.0	4.0 - 6.0	4.5 - 6.5

- Feed in addition to high quality hay or pasture at a rate of 0.5 – 1.5% of body weight.
- Ensure that salt and clean, fresh water is available.
- Individual metabolism rates may require a 10 – 15% deviation.
